

ACCURACY IS NOT A QUESTION OF SIZE.

SENSOTORK® 701 – Whenever absolute tightening accuracy has to be assured and documented in confined spaces, the new STAHLWILLE electronic torque wrench comes into its own. Besides its slim, compact shape, this tool features innovative and intuitive single-button control and a permanently installed fine-tooth ratchet with 80 teeth.

HIGH-GRADE.

Durable quality – Made in Germany.

ACCURATE.

The SENSOTORK® 701 measures to within $\pm 4\%$. Always.

INDICATING.

For torques from 1 to 20 N·m – also the ideal choice for bolt tightening on modern materials such as plastic, carbon and aluminium.

ERGONOMICALLY DESIGNED.

Strain-free working thanks to the specially designed handle.

INTUITIVE.

The required mode of operation (track, peak hold, joint evaluation) can be quickly and easily set using the single-button setting system.

COMPACT.

Space-saving design for safe, accurate work in awkward places.

SAFE.

Thanks to the permanently integrated fine-tooth ratchet (80 teeth, tight return ratchet angle of only 4.5°) and QuickRelease safety lock.

Combined with the **SENSOMASTER 4 software**, (refer to p. 6/7), users have many additional options:

- Setting the joint
- Evaluation of the tightening operation by means of coloured LEDs, buzzer and vibration
- Adjustable calibrating interval
- Logging function
